The Reporting Process:

The reporter's name is kept confidential. It is accessible only if the reporter consents, by court order, or by court procedure. If you are required to report known or suspected abuse or neglect and fail to do so, you are guilty of a misdemeanor. If a child protection report results in a court hearing, you may be asked to testify.

If you suspect a child is being abused or neglected, you cannot shift the responsibility of reporting to a supervisor, or to someone else in the office, school, clinic or licensed facility. You alone are required to make the report to the responsible agency.

What Happens Next?

Reports made to child welfare agencies are first screened to determine whether a report meets the criteria to be assigned for a child protection response. If maltreatment occurred in a family and meets the statutory definition, it is assigned for an Investigative response or a Family Assessment response.

Learning the Outcome:

A mandated reporter can find out if a report has been accepted for investigation and will receive a summary of a disposition of the report, unless such a release of information would be detrimental to the best interests of a child.
